

gap^{insights}

Proactively manage travel risk by automatically informing people of minor and major events unfolding around them.

- Triage real-time crisis alerts and perform analysis on the intelligence gathered
- Populate itineraries manually, using natural language parsing or through GDS integration
- Manage safety efficiently using automatic check-in requests to users in an emergency environment
- Store important files such as country briefs securely online and reference them in your automation rules
- Plug in any type of RSS feed including, news, weather and social media
- Manage risk levels and ratings of alerts, points, routes and regions
- Automate time-sensitive actions using the sophisticated rules engine
- Send pre-travel advisories, briefs and alerts to people based on time, location and policies
- Perform actions autonomously based on incoming alerts, itinerary amendments, user information and much more
- Allow users to individually manage their travel and user profile using the GAP Traveller Portal
- Send targeted alerts based on different criteria e.g. location and user information
- Pinpoint any employee, anywhere on earth, quickly and accurately
- Reference user information to avoid potentially dangerous/illegal travel e.g. medical history, sexuality and religion

Combine active and passive tracking

GAP Insights is the perfect companion to the GAP Portal. Combining both products gives you a comprehensive understanding of your people's whereabouts, even when users don't want to be actively tracked and traced.

STREAMLINE TRAVEL POLICIES

Our Rules Engine is a powerful tool for performing actions based on itineraries, intelligence and alerts automatically. It runs constantly in the background, monitoring data and alerting you based on rules you set up. You can streamline complex business travel policies and automate alerts and actions before, during and after travel.

MANAGE SAFETY EFFICIENTLY

Manage safety by exception using automatic check-in requests to users in a crisis environment. You can ensure everyone is accounted for and focus your efforts where they are really needed. Whether they're on the road, at home or in the office, you can consolidate everyone's travel data to quickly determine which people may be affected by an incident.

FLEXIBLE TECHNOLOGY

GAP Insights is the most flexible technology tool on the market, allowing you to create a travel risk management solution that's genuinely relevant to your travellers. You can plug in any type of risk feed, reference any document, risk assessment or travel policy, amend risk ratings and offer local assistance if necessary.
